

Quentin PILARD

Senior Biostatistician

Born on 31/05/1993

Nationality: French

✉ Quentin.Pilard@biotrial.com

☎ (+33) 6 35 58 45 62

Professional Experience

BIOTRIAL BIOMETRICS, Rennes — Biostatistician

11/2024 – Present

- Scientific lead for the launch of the Real-World Evidence (RWE) activity
- Collaboration with internal teams to promote the RWE offering
- Delivery of internal and external training sessions (e.g. EHESP) to strengthen RWE visibility and expertise
- Active participation in RWE working groups (national AFCRO, European PSI)

QUINTEN HEALTH, Paris — Senior Biostatistician

10/2020 – 10/2024

- Scientific lead on client studies
- Scientific contribution to two EMA-related studies:
 - Literature review of statistical methods for information borrowing in pediatric trials
 - Drafting of a call for proposals on clinical trial replication using observational data
- Scientific monitoring:
 - Development of a simulation study to assess the performance of causal inference methods
 - Delivery of training sessions (e.g. Target Trial Emulation, DAGs, multi-state models)
- Mentoring of junior biostatisticians
- Supervision of three interns (including one leading to a publication and a poster)
- Participation in recruitment and technical interviews
- Implementation of the statistical team Git repository to ensure reproducibility of analyses

INSERM, Bordeaux — Statistical Research Engineer

10/2019 – 09/2020

- Analysis of relationships between lifestyle factors and neuroimaging and cognitive trajectories (3-Cities cohort)
 - Development of mixed models with latent processes and latent classes
 - Contribution to the statistical development of a multidimensional dynamic latent process model
- Participation in ISPED teaching activities

THE GEORGE INSTITUTE FOR GLOBAL HEALTH, Sydney (Australia)

03/2017 – 09/2019

Biostatistician

- Contribution to the analysis of interventional trials on care and screening programs
- Writing of protocols and statistical analysis plans
- Statistical analyses in SAS and R
- Writing of statistical sections of scientific publications

Biostatistics Intern

– first 6 months –

- Analysis of ordinal regression models applied to the modified Rankin Scale in three stroke clinical trials

Education

MSc in Biostatistics, ISPED, Bordeaux

2015 – 2017

Skills

Statistical Expertise

- Advanced linear mixed models for longitudinal data (e.g., latent class and latent process models)
- Advanced survival models (e.g., joint models, multi-state models)
- Marginal models (e.g., propensity score, G-computation)

Software

- Statistical programming:
 - R and R Shiny
 - Python/PySpark
 - SAS
- Version control:
 - GitHub
- Scientific writing:
 - LaTeX and Zotero

Languages

- French (native)
- English (IELTS, competent user)

Scientific Contributions

BIOTRIAL BIOMETRICS

Posters (presenter):

- SnB, Paris, 2025: Latest developments in statistical approaches for concentration-QT assessment: Clinical and nonclinical considerations

QUINTEN HEALTH

Posters (presenter):

- ECTRIMS, Copenhagen, 2024: Analyzing Recurrent Events in Multiple Sclerosis: A review of Statistical Models with Application to MSOAC Trial (work following supervision of D. Herman internship)

Articles:

- Herman D, Tanniou J, Leray E, Pierret C, **Pilard Q**. Analyzing recurrent events in multiple sclerosis: a review of statistical models with application to the MSOAC database. *J Neurol*. May 3, 2025;272(5):371.
- Chaves SS, Naeger S, Lounaci K, Zuo Y, Loiacono MM, **Pilard Q**, et al. High-Dose Influenza Vaccine Is Associated With Reduced Mortality Among Older Adults With Breakthrough Influenza Even When There Is Poor Vaccine-Strain Match. *Clin Infect Dis*. Oct 1, 2023;77(7):1032-42.

THE GEORGE INSTITUTE FOR GLOBAL HEALTH

Oral communications (presenter):

- World Stroke Congress, Montreal, 2018: Optimal analysis of the modified Rankin Scale (work from M2 internship)

Articles:

- Patel A, Praveen D, Maharani A, Oceandy D, **Pilard Q**, Kohli MPS, et al. Association of Multifaceted Mobile Technology-Enabled Primary Care Intervention With Cardiovascular Disease Risk Management in Rural Indonesia. *JAMA Cardiol*. Oct 1, 2019;4(10):978-86.
- Jun M, Jardine MJ, Perkovic V, **Pilard Q**, Billot L, Rodgers A, et al. Hyperkalemia and renin-angiotensin-aldosterone system inhibitor therapy in chronic kidney disease: A general practice-based, observational study. *PLOS ONE*. Mar 7, 2019;14(3):e0213192.
- Atkins E, **Pilard Q**, Rodgers A. Blood pressure and treatment patterns by season in Australian primary care: an analysis of the MedicineInsight database. *JACC*. Mar 24, 2020;75(11 Supplement 1):1966.

Other Activities

Creation and maintenance of a website dedicated to statistical methods for Real-World Data analysis
